

CLEAN ROOM & HVAC SOLUTION
(Design / Manufacturing / Service)

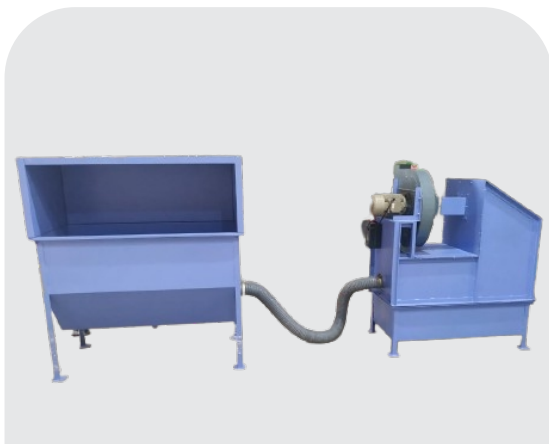

REVERSE LAMINAR AIR FLOW

Introducing the RLAF (Reverse Laminar Air Flow) by Breath Air System LLP, a state-of-the-art solution for maintaining a clean and sterile environment in your Cleanroom. The RLAF utilizes advanced air filtration technology to provide a laminar airflow that effectively removes airborne particles and contaminants, ensuring the purity of your work area. This RLAF Unit is equipped with a three stage filtration method, for providing excellent efficiency to the customers. With its compact design and quiet operation, the RLAF offers seamless integration into your existing space. Trust in the reliability and performance of Breath Air System LLP's RLAF for Sampling & Dispensing process.

Key Features

- A wide range of configurations to suit any containment application.
- Easy to clean and disinfect and double sandwich type side panel.
- Minimum noise & vibration level.
- protection grills for each filter.
- Front Anti-Static PVC Curtains (for warehouse applications)

Air Cleanliness	Class 100
MOC	Stainless Steel 304 or 316L
Filtration System	Pre Filter – 10 Micron (Washable) Fine Filter – 3 Micron (Washable) HEPA Filter – 0.3 Micron
Air Velocity	90 +/- 20 FPM

**FILTER CLEANING
BOOTH**

The filter cleaning booth features two essential components: the Filter Cleaning Station and the Wet Scrubber with a Venturi system and exhaust. This integrated system provides a safe and controlled environment for filter maintenance, maximizing efficiency and compliance with air quality regulations."

**GARMENT CABINET
(STATIC / DYNAMIC)**

The Sterile Garment Cabinet provides a clean, secure storage solution for sterile garments, ideal for labs, clean rooms, and pharmaceutical facilities. Available in static and dynamic models, it features durable stainless steel construction and Pre Filter, HEPA filter, Blower & Motor assembly for the dynamic version
